Letter of consent for COVID-19 vaccination for 5-11 year-olds

The Flemish government wants to protect people against the coronavirus by getting them vaccinated against COVID-19 in the Flemish vaccination centres. Vaccination is possible for all children aged 5 and up. Only children who are already 5 years old at the time of vaccination are eligible for vaccination.

This letter is considered as a parental consent for COVID-19 vaccination. Only if you cannot accompany your child to the vaccination centre, your child, accompanied by another adult, can use this letter. Coordinate the vaccination in advance with the other parent or guardian and make a joint and supported decision about the vaccination of your child before the appointment.

Child's name + first name:

Child's date of birth:/...../.....

Parent/guardian surname + first name:

Tick what applies:

Parent

Guardian

Telephone number of parent/guardian:

Tick the desired choice:

I wish to have my child vaccinated against COVID-19.

Date:	Name and signature of parent/guardian + statement 'read and approved:
-------	---

For more information on COVID-19 vaccination, please visit www.laatjevaccineren.be.

Note! The following questions will help us identify possible contra-indications for vaccination. Allergy here refers 'swelling of the mouth or throat', and/or 'difficulty breathing' and/or 'problems with the heart'. Tick the appropriate answer.

Has your child had any serious reactions in the past after a vaccination or after taking medication? yes no

Is your child allergic to PEG (polyethylene glycol) or polysorbate? yes no
 I do not know*

Did your child ever suffer from anaphylaxis? (Anaphylaxis is a serious, life-threatening allergic reaction.) yes no

Did your child ever suffer from Quincke's oedema (swelling in the throat, tongue)? yes no

Does your child suffer from systemic mastocytosis or hereditary angioedema? yes no
 I do not know*

Does your child have asthma, and does it often suffer from it, even though he is taking medication? yes no

**Don't worry if you do not know. This is not a contra-indication to the vaccination.*
